## Description

Green is the colour of scrubs in treatment rooms, on many hospital wards and in veterinary practices – **XBLUE green clogs** match a green scrub set. They are ultralight and antistatic, with a shock-absorbing heel and a slip-resistant sole, and the smooth EVA foam is easy to keep clean: wipe, rinse or machine wash at 50°C. CE marked, EN ISO 20347:2022, meet HACCP requirements.

## XBLUE clog design and features

XBLUE (also written X-BLUE) are EVA foam work shoes – one model in 7 colours for women and men.

- **Ultralight** – max. 340 g a pair, size 38 approx. 230 g
- **Antistatic** – dissipate electrostatic charges (EN ISO 20347:2022)
- **Slip-resistant SRC sole** – the highest slip-resistance class; the tread channels liquids away
- **Heel energy absorption (E)** – certified energy absorption in the heel area
- **Anatomical removable footbed** – arch support, toe bar, massaging nubs
- **Swivel strap** – behind the heel or in front like a slide
- **Washable at 50°C** – also in a washing machine
- **Meet HACCP requirements** – for kitchens and the food industry
- **Antibacterial sole** – easier hygiene
- **CE, EN ISO 20347:2022** – occupational footwear

The smooth closed toe has no holes and protects the foot against liquids and small objects; the ventilation holes (at least 5 on each side) sit low on the shoe.

## Collection

Based on many years of experience, we have developed, under the JULEX brand, footwear for professionals, persons working in the most severe conditions. We combined qualities such as resistance, protection and comfort, at the same time preserving compliance with the requirements of European standards for professional and protective footwear. Most models may be used in companies which have implemented the **HACCP system**. Our footwear is durable and resistant to external factors, which allowed usage in food industry, meat industry and gastronomy.
