Description

Type: medical socks made of bamboo yarn Composition: bamboo yarn 78%, poliyamide 19%, Lycra® 3%, Sanitized® finish Design: lain, 4 colours, Description: Fine women's and men's socks of special design ensuring perfect grip to the leg without binding. They have natural long-lasting antibacterial properties additionally enhanced by a built-in antibacterial and antifungal protection with Sanitized® finish, ensuring almost complete elimination of all microbes as well as anti-odour properties. Bamboo yarn has natural ability to allow the feet to breathe and transports excess moisture away from the foot. The socks' exceptional comfort of use is ensured by their softness to touch and seamless sock finishing above toes. Socks are designed particularly for diabetics and people with blood circulation problems in legs. The CE mark for a medical product Awarded at "DIABETICA EXPO 2008"!
